

CYBER CYPHER 3.0

PROBLEM STATEMENT - ADVANCED LEVEL

Aryan is the owner of a family-owned grocery store located in Mumbai. He grew up in an underprivileged background, and he remembers vividly the struggles that his family store faced due to poor inventory management and untimely food orders. These issues led to a decline in business, and ultimately, poverty. He approached fetch.ai to help him out with his grocery store issues. Develop a solution that utilizes the uAgents of fetch.ai and create a deep learning model to help save his business.
